

## Seminar

# 10X Genomics Cloud Analysis Workshop: Hosted by the Duke CFAR Immunology Core

May 2, 2025

9AM–1PM

Trent Semans Center for Health  
Education Center

**Classroom 3/Room 3025**

8 Searle Center Drive  
Durham, NC, 27710

### Presented to Duke University

In this workshop, you will be introduced to the single cell gene expression analysis journey. Analysis begins at experimental design.

Together we will explore how to analyze your single cell sequencing data through the use of a sample data set and the power of Cell Ranger and the 10x Cloud Analysis platform. From there we will discuss how to assess the data quality using Cell Ranger Web Summaries and using the Loupe Browser, visualization software, for initial analysis.

To wrap things up, each participant will have the opportunity to map out their own analysis journey moving forward by sitting down with the FAS team from 10x Genomics and local onsite bioinformaticians.

Questions? Please reach out to [bryan.hess@10xgenomics.com](mailto:bryan.hess@10xgenomics.com).

### Featuring

**Marietta Easterling**  
Field Application  
Scientist  
10x Genomics

**Saroja Kolluru**  
Field Application  
Scientist  
10x Genomics

**Bryan Hess**  
Senior Account  
Executive
